## Dear Clients

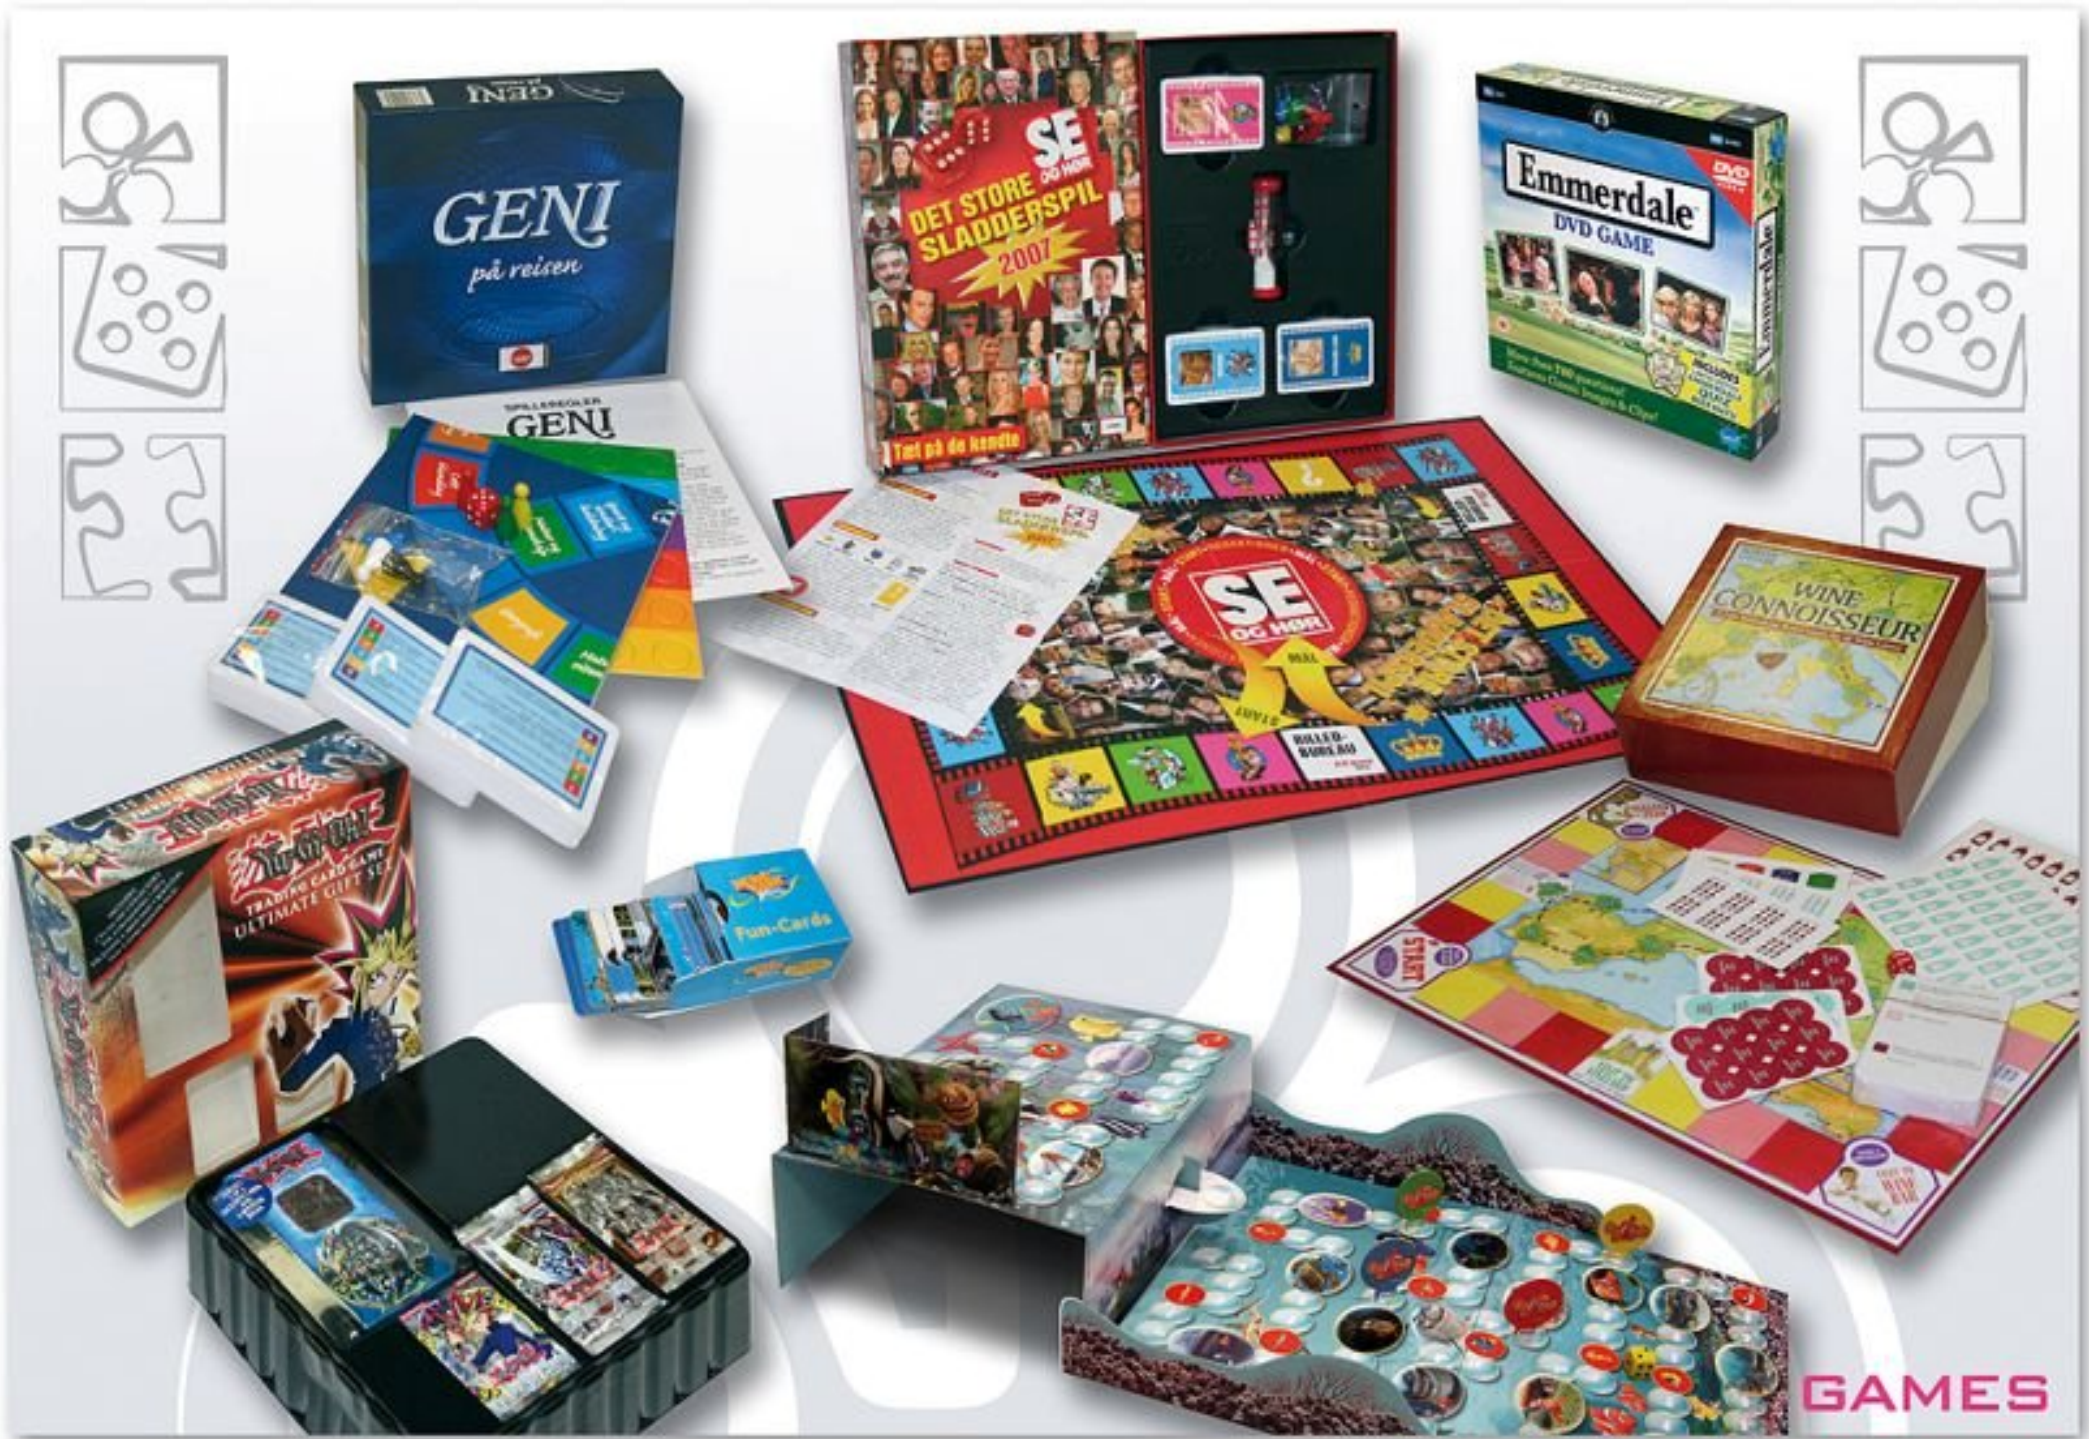

It is our pleasure and pride to present you with our new catalogue with products we have manufactured for our customers. What you can see here reflects but a part of the products based on cardboard and paper we can deliver. We present both puzzles, games, and playing cards designed for big toy traders, and promotional products. Thanks to our experience in the trade, accumulated for over 20 years, the quality of our products is always perfect. Our advantages also include flexibility, attractive prices, and short lead times. We hope that this catalogue will encourage you to contact us to get a quotation and initiate cooperation.

### ● GAMES

Thanks to contacts with our customers all over the world we have had the satisfying opportunity to produce games known in many countries for them. We have manufactured both simple games, and games made up of many components (playing pieces, plastic or wooden dices, cards, playing boards, or plastic inlays) in low and high quantities. We have also produced promotional games for large and well known companies out of the toy branch.

## JIGSAW PUZZLES

Our core business is production of jigsaw puzzles. Thanks to many years' experience in this field you can be sure our puzzles will always be of top quality. TREFL is very well known for highly precise and very narrow-lined cutting of the puzzle pieces. A combination of experience, quality and most recent printing technology has allowed us to become the manufacturer of highly successful 3D puzzles made of lenticular material which gives the pictures an incredible depth effect. Puzzles can be produced in any format, shape or number of pieces, which makes them an excellent tool for promoting your own products.

JIGSAW PUZZLES

## ● PLAYING CARDS

Card manufacturing represents another major line of our business. We produce decks of various numbers of cards, in many formats, using various materials, dedicated to professional and home players.

Cards can be packed in foil and/or a decorative box. Because of their small dimensions and possibility of printing virtually any graphics on card front and back, as well as on the box, cards make an excellent product for kids, adults, and promotion campaigns.

## PLAYING CARDS

## ● PACKING BOXES

To meet the expectations of different customers we can produce boxes made of high quality, solid, soft and corrugated cardboard. Just like in case of other products we offer, the packing boxes can be given any graphics, format, and shape.

## ● PAPER AND CARDBOARD ACCESSORIES

Paper and cardboard hold no secrets for us. With the technical skills and experience of our employees in the areas of product development, die-cutting, technology and artwork, we can produce a broad variety of products embodying even the most unusual designs or ideas like collector coupons, pads of different shapes, door signboards, rulers, photo frames and many others.

## BINDERS AND CLIPBOARDS

In its offer, TREFL also has various binders and clipboards which combine promotional or advertising functions with their prime designation: keeping documents, training materials or technical specifications.

## TECHNOLOGY

We are a company highly experienced in specialised high standard poligraphy. In the services offered we use a variety of printing and bookbinding techniques, to mention e.g.:

- punching/diecutting
- paper/cardboard laminating with the edges folded or unfolded
- print impress cardboard stamping
- binding
- Ultraviolet laquer - full size or point varnishing
- silkscreen printing
- off -set printing ( 5 colours, up to size B1)
- diecut manufacturing

The world-level quality of our products has gained official recognition. Trefl is the first domestic manufacturer of the toy-making trade to have obtained the ISO 9001 standard certificate of compliance for its corporate quality system in designing, production, and sale of puzzles and games.
